Mistral65 Enclosure 36M – Summary Sheet

Summary

This 36 Module DIN Rail meter enclosure has been designed to make installation quick and easy. Meeting the most recent regulatory requirements, the internal space has been designed to make cables more accessible and special eyeholes on the frame allow cable ties to be anchored securely.

Product Code

ENCL36MP

Material

Plastic

No. of DIN Rail Modules

36

Availability

Next Day

Brand

ABB

The transparent door is fully reversible and has an ergonomic handle and snap-on closing, with an optional lock available for added security. Interior slots allow the enclosure to be fixed to the wall in points which are not visible from the outside

Dimensions

Pre- Wiring Service

Let our experienced meter engineers pre-wire your enclosure for you prior to dispatch, allowing quick and easy installation right out of the box.

This service is available with any of our CT operated DIN-Rail and Panel mounted meters, and we have a wide range of metal and plastic enclosures to suit. The service includes supply and installation of all terminal blocks and a 5 Amp fuse per phase, as well as supplying an auxiliary power supply to the meter.

Many of our enclosures can be fitted with multiple meters, and so this service is charged on a per meter basis. Simply select the meter/s required along with the required current transformers, include a suitable enclosure, and add the required quantity of this service. Not sure of your requirements, contact our friendly sales team who will be more than happy to provide you with an itemised quotation.
