

Three Phase DIN Rail Metering Kit

Our three phase DIN rail metering kit is built for fast and easy installation and is ideal for retrofit applications. The compact enclosure has cable entry points on either side and our meter engineers pre-fit the required CT links, voltage reference and earthing with clear labelling. It comes complete with split core CT's that simply clip around the supplies, saving time and disruption.

This kit is available with one of three meters offering a range of features from simple pulse outputs to remote access to readings via ethernet. You can also select CT's appropriate for your circuit with 24mm & 36mm apertures available covering loads of 100A to 400A. Can't find a meter or CT to suit your requirements, contact our friendly sales teams who will be happy to put together a bespoke quotation.

What's included?

- 1 x 3-Phase DIN Rail Meter (see options below)
- 1 x ABB Mistral 8 Module Enclosure
- 3 x Split Core CT (select ratio & aperture upon order)
- CT links, voltage reference and earthing terminals
- 1m of 1.5mm stranded blue, brown, black & grey cable
- 1m of 2.5mm stranded earth cable

Meter Options

	ND Metering Solutions - Rail 350	Eastron - SDM630MCT – Modbus	Eastron - SDM630MCT – Mbus	Socomec - E48
MID Approved	No	Yes	Yes	Yes
Output Type	Pulse	Modbus & Pulse	Mbus & Pulse	Ethernet
Tariffs	Single	Single	Single	Multi Tariff
Import / Export	Import Only	Import & Export	Import & Export	Import & Export
