Eastron SDM630-WiFi - Summary Sheet

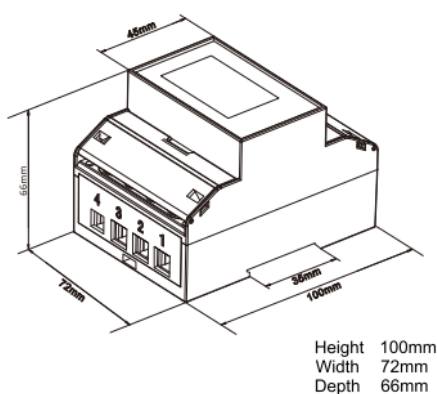

Summary

The SDM630-WIFI is a high-performance, multifunction three-phase energy meter designed for accurate monitoring and remote data access. It supports direct connection up to 100A without external current transformers. Featuring built-in WiFi, it enables real-time energy tracking and centralized management via compatible platforms. The meter measures a wide range of parameters including voltage, current, power, power factor, frequency, and total energy (import/export). With MID certification for billing-grade accuracy, configurable pulse outputs, and a backlit LCD display, the SDM630-WIFI is ideal for industrial, commercial, and renewable energy applications.

Product code	SDM630-WiFi
Meter Type	Three Phase
Fitting Type	DIN Rail
Max Current (amps)	100A
MID Approved	Yes
Smart	Yes
Input Type	Direct Connected
Output Type	Pulse </td
Tariffs	Single
Import / Export	Import & Export
Module Width	4
Availability	Next Day
Condition	New
Brand	Eastron
Country Of Manufacture	China
